

KENNEDY WILSON

INVESTOR PRESENTATION

FOURTH QUARTER 2016

(As of December 31, 2016)

Disclaimer/Forward-Looking Statements

Statements made by us in this presentation and in other reports and statements released by us that are not historical facts constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are necessarily estimates reflecting the judgment of our senior management based on our current estimates, expectations, forecasts and projections and include comments that express our current opinions about trends and factors that may impact future operating results. Some of the forward-looking statements may be identified by words like “believes”, “expects”, “anticipates”, “estimates”, “plans”, “intends”, “projects”, “indicates”, “could”, “may” and similar expressions. These statements are not guarantees of future performance and involve a number of risks, uncertainties and assumptions. Accordingly, actual results or the performance of Kennedy-Wilson Holdings, Inc. (the “Company”) or its subsidiaries may differ significantly, positively or negatively, from forward-looking statements made herein. Unanticipated events and circumstances are likely to occur. Factors that might cause such differences include, but are not limited to, the risks that the Company’s business strategy and plans may not receive the level of market acceptance anticipated; disruptions in general economic and business conditions, particularly in geographic areas where our business may be concentrated; the continued volatility and disruption of the capital and credit markets, higher interest rates, higher loan costs, less desirable loan terms, and a reduction in the availability of mortgage loans and mezzanine financing, all of which could increase costs and

could limit our ability to acquire additional real estate assets; continued high levels of, or increases in, unemployment and a general slowdown in commercial activity; our leverage and ability to refinance existing indebtedness or incur additional indebtedness; an increase in our debt service obligations; our ability to generate a sufficient amount of cash from operations to satisfy working capital requirements and to service our existing and future indebtedness; our ability to achieve improvements in operating efficiency; foreign currency fluctuations; adverse changes in the securities markets; our ability to retain our senior management and attract and retain qualified and experienced employees; our ability to attract new user and investor clients; our ability to retain major clients and renew related contracts; trends in the use of large, full-service commercial real estate providers; changes in tax laws in the United States, Europe or Japan that reduce or eliminate our deductions or other tax benefits; future acquisitions may not be available at favorable prices or with advantageous terms and conditions; and costs relating to the acquisition of assets we may acquire could be higher than anticipated. Any such forward-looking statements, whether made in this report or elsewhere, should be considered in the context of the various disclosures made by us about our businesses including, without limitation, the risk factors discussed in our filings with the U.S. Securities and Exchange Commission (“SEC”). Except as required under the federal securities laws and the rules and regulations of the SEC, we do not have any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events, change in assumptions, or otherwise.

The information with respect to the projections presented herein is based on a number of assumptions about future events and is subject to significant economic and competitive uncertainty and other contingencies, none of which can be predicted with any certainty and some of which are beyond the company’s control. There can be no assurances that the projections will be realized, and actual results may be higher or lower than those indicated. Neither the company nor any of their respective security holders, directors, officers, employees, advisors or affiliates, or any representatives or affiliates of the foregoing, assumes responsibility for the accuracy of the projections presented herein.

The Kennedy Wilson Difference

Global Network

We leverage real time information from our global footprint and relationships created from 30 years of transacting in real estate

Definitions

Adjusted EBITDA: represents net income before interest expense, our share of interest expense included in income from investments in unconsolidated investments, depreciation and amortization, our share of depreciation and amortization included in income from unconsolidated investments, loss on early extinguishment of corporate debt and income taxes, share-based compensation expense for the Company and EBITDA attributable to noncontrolling interests.

Please also see the reconciliation to GAAP in the Company's supplemental financial information included in this release and also available at www.kennedywilson.com. Our management uses Adjusted EBITDA to analyze our business because it adjusts net income for items we believe do not accurately reflect the nature of our business going forward or that relate to non-cash compensation expense or noncontrolling interests. Such items may vary for different companies for reasons unrelated to overall operating performance. Additionally, we believe Adjusted EBITDA is useful to investors to assist them in getting a more accurate picture of our results from operations. However, Adjusted EBITDA is not a recognized measurement under GAAP and when analyzing our operating performance, readers should use Adjusted EBITDA in addition to, and not as an alternative for, net income as determined in accordance with GAAP. Because not all companies use identical calculations, our presentation of Adjusted EBITDA may not be comparable to similarly titled measures of other companies. Furthermore, Adjusted EBITDA is not intended to be a measure of free cash flow for our management's discretionary use, as it does not remove all non-cash items (such as acquisition-related gains) or consider certain cash requirements such as tax and debt service payments. The amount shown for Adjusted EBITDA also differs from the amount calculated under similarly titled definitions in our debt instruments, which are further adjusted to reflect certain other cash and non-cash charges and are used to determine compliance with financial covenants and our ability to engage in certain activities, such as incurring additional debt and making certain restricted payments.

Adjusted Fees: Refers to Kennedy Wilson's gross investment management, property services and research fees adjusted to include fees eliminated in consolidation and Kennedy Wilson's share of fees in unconsolidated service businesses. Our management uses Adjusted fees to analyze our investment management and real estate services business because the measure removes required eliminations under GAAP for properties in which the Company provides services but also has an ownership interest. These eliminations understate the economic value of the investment management, property services and research fees and makes the Company comparable to other real estate companies that provide investment management and real estate services but do not have an ownership interest in the properties they manage. Our management believes that adjusting GAAP fees to reflect these amounts eliminated in consolidation presents a more holistic measure of the scope of our investment management and real estate services business.

Adjusted Net Income: Represents net income before depreciation and amortization, our share of depreciation and amortization included in income from unconsolidated investments, share-based compensation and net income attributable to noncontrolling interests, before depreciation and amortization. Please also see the reconciliation to GAAP in the Company's supplemental financial information included in this release and also available at www.kennedywilson.com.

Cap Rate: Represents the net operating income of an investment for the year preceding its acquisition or disposition, as applicable, divided by the purchase or sale price, as applicable. Cap rates set forth in this presentation only includes data from income-producing properties. We calculate cap rates based on information that is supplied to us during the acquisition diligence process. This information is often not audited or reviewed by independent accountants and may be presented in a manner that is different from similar information included in our financial statements prepared in accordance with GAAP. In addition, cap rates represent historical performance and are not a guarantee of future NOI. Properties for which a cap rate is provided may not continue to perform at that cap rate.

Equity Multiple: Equity multiple is calculated by dividing the amount of total distributions received by KW from an investment (including any gains, return of equity invested by KW and promoted interests) by the amount of total contributions invested by KW in such investment. This metric does not take into account management fees, organizational fees, or other similar expenses, all of which in the aggregate may be substantial and lower the overall return to KW. Equity multiples represent historical performance and are not a guarantee of the future performance of investments.

Estimated Annualized NOI: "Estimated annualized NOI" is a property-level non-GAAP measure representing the estimated annualized net operating income from each property as of the date shown, inclusive of rent abatements (if applicable). The calculation excludes depreciation and amortization expense, and does not capture the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures, tenant improvements, and leasing commissions necessary to maintain the operating performance of our properties. Any of the enumerated items above could have a material effect on the performance of our properties. Estimated annualized NOI is not an indicator of the actual annual net operating income that the Company will or expects to realize in any period. Estimated annualized NOI for properties held by KWE are presented as reported by KWE. Please also see the definition of "Net operating income" below.

Investment Management and Real Estate Services Assets under Management ("IMRES AUM): Generally refers to the properties and other assets with respect to which we provide (or participate in) oversight, investment management services and other advice, and which generally consist of real estate properties or loans, and investments in joint ventures. Our AUM is principally intended to reflect the extent of our presence in the real estate market, not the basis for determining our management fees. Our AUM consists of the total estimated fair value of the real estate properties and other real estate related assets either owned by third parties, wholly owned by us or held by joint ventures and other entities in which our sponsored funds or investment vehicles and client accounts have invested. Committed (but unfunded) capital from investors in our sponsored funds is not included in our AUM. The estimated value of development properties is included at estimated completion cost.

IRR: "IRR" is based on cumulative distributions to date on each investment and is the leveraged internal rate of return on equity invested in the investment. The IRR measures the return on KW's investment in each asset including promoted interests, expressed as a compound rate of interest over the entire investment period. This return does not take into account management fees, organizational fees, or other similar expenses, all of which in the aggregate may be substantial and lower the overall return to KW. IRR represents historical performance and is not a guarantee of the future performance of investments.

KW Cap Rate: Represents the Cap Rate (as defined) weighted by the Company's ownership interest in the underlying investments. Cap rates set forth in this presentation includes data only from income-producing properties. We calculate cap rates based on information that is supplied to us during the acquisition diligence process. This information is often not audited or reviewed by independent accountants and may be presented in a manner that is different from similar information included in our financial statements prepared in accordance with GAAP. In addition, cap rates represent historical performance and are not a guarantee of future NOI. Properties for which a cap rate is provided may not continue to perform at that cap rate.

Same Property: Refers to properties in which Kennedy Wilson has an ownership interest during the entire span of both periods being compared. The same property information presented throughout this report is shown on a cash basis and excludes non-recurring expenses. This analysis excludes properties that are either under development or undergoing lease up as part of our asset management strategy.
