Kennedy Wilson invests alongside its partners with an average ownership of 19% in the industrial platform, which includes a mix of core-plus and value-add urban logistics and industrial properties with development potential. The platform totals \$440 million in equity, representing \$392 million in fee-bearing capital and \$12.5 million in annual NOI and fees to Kennedy Wilson, which are expected to grow to \$16 million as the industrial development projects are completed and leased.

Since January 2021, the Kennedy Wilson team has acquired 32 industrial assets across the United Kingdom, Ireland and Spain totaling \$670 million, bringing the overall European industrial platform to 55 assets. Total industrial AUM grew from \$339 million at year end 2020 to a current \$1.2 billion, reflecting 241% portfolio growth this year.

“When we launched our industrial platform a year ago, we anticipated strong demand for last-mile logistics properties in close proximity to transit centers, as they enable companies to efficiently distribute their products into customers’ hands,” said Mary Ricks, President of Kennedy Wilson. “The pandemic accelerated our thesis with online sales penetration continuing to grow, prompting a massive demand for space that has pushed vacancies to an all-time low. As a result, our industrial platform has expanded significantly in 2021, and will continue to be a growth driver for our investment management business in the year ahead.”

About Kennedy Wilson
